Professional Summary

AI Software Engineer who ships production LLM, RAG, and multi-agent systems for enterprise data-protection platforms at Dell Technologies. Owns the full lifecycle from design to deployment, with measured gains in engineering speed, test coverage, and release quality. **ISG President's Award (Q3)** recipient. Skilled in Python, Go, Java, FastAPI, Spring Boot, Docker, and CI/CD.

Technical Skills

Languages: Python, Go, Java, TypeScript, JavaScript, SQL
AI / GenAI: LLMs, RAG, Multi-Agent Systems, LangChain, Prompt Engineering, Vector Search, ChromaDB, FAISS, Ollama, Federated Learning, TensorFlow, Pandas
Backend & Frontend: FastAPI, Spring Boot, Flask, Node.js, REST APIs, WebSockets, Angular, React.js
Testing & DevOps: JUnit 5, Pytest, Integration Testing, Test Automation, Docker, Maven, Git, Artifactory, Puppet, CI/CD
Databases & Search: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Firebase, ZODB

Professional Experience

Software Engineer **Aug 2025 – Present**
Dell Technologies, Data Protection (DPSE)

- Built and shipped a **RAG-based AI assistant** for PowerProtect Data Manager and PowerProtect One, with PDF and knowledge-base ingestion, ChromaDB retrieval, and conversational context retention; deployed through RPM, Artifactory, SSL, Puppet, Eureka, and Zuul.
- Designed a **multi-agent platform** with external-agent registration, asymmetric key-exchange authentication, health polling, and remote execution; delivered the Restore Agent as a standalone FastAPI/Docker service with six integration tests.
- Re-architected agent boundaries with a **configuration-driven tool framework**: consolidated 36 tools into shared JSON (40+ files reduced to 19) and moved 18 data-retrieval capabilities into a dedicated PPDM agent.
- Built an **AI-powered migration framework** that converts product manuals into YAML and generates 3,200+ lines of Go adapter code, with an Angular wizard and WebSocket progress; cut prototype build time from six weeks to three days and migration errors from 30% to under 5%.
- Automated JUnit generation and quality analysis across 22+ PowerProtect One components, reducing test creation time by 95% and raising code coverage from 30% to 70–95%.
- Prototyped a **federated-learning anomaly-detection** system in Go (115+ tests, 50 simulated clients), with an ensemble model reaching a 2% false-positive rate.
- Resolved release-blocking defects for the 20.4 AI Assistant release, including task-completion, telemetry, and scheduled-report routing issues.

Analyst Trainee **Jan 2025 – Jun 2025**
AltoMeta Consulting

- Built a real-time LLM chat system with OCR-based PDF ingestion, versioned FAISS indexing, and modular MCP workflows; improved accuracy by 30%, throughput by 40%, and cut latency by 500 ms.

Project Intern **Aug 2024 – Apr 2025**
Dell Technologies

- Built an LLM-assisted anomaly-detection system with ensemble models and Ollama-generated explanations, plus a React dashboard tracking 20K+ anomalies per month.

Product Developer Intern **Apr 2024 – Jul 2024**
Newton's Apple

- Developed PhishInstinct, an AI-powered phishing simulation platform with automated campaigns, Amazon SES delivery, device fingerprinting, and real-time threat analytics.

Projects

- **DeepTraceAI: Compliance & Anomaly Detection** | *Python, Flask, Redis, Docker, React.js, Ollama*: automated CIS audits across 1,200+ guidelines using retrieval and LLM-generated Bash scripts, with real-time ZODB monitoring and ensemble anomaly detection.
- **DreamBridge: AI Career Guidance Platform** | *Python, Streamlit, NLP, Transformers* | GitHub: resume parsing, skill-gap analysis, and job-role matching using generative AI and NLP.

Education

Birla Institute of Technology and Science (BITS), Pilani – WILP **2026 – Present**
M.Tech in Artificial Intelligence and Machine Learning

Pune Institute of Computer Technology **Jun 2025**
Bachelor of Engineering, Computer Engineering *CGPA: 9.22/10*

Awards & Recognition

- **ISG President's Award (Q3), Dell Technologies**: recognized for impact on the PowerProtect Data Manager AI Assistant.
- **Finalist, Amdocs GenAI Hackathon 2025**; **2nd Place, Innovex Hackathon, AIT**; **3rd Place, INC Competition, PICT**.
