EDUCATION

Pune Institute of Computer Technology **June 2025**
Bachelor in Computer Engineering *Current GPA - 9.3/10*

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, HTML5, CSS3, JavaScript
Libraries and Frameworks: React.js, Next.js, Node.js, Express.js, Spring Framework with Spring Boot, Flask, Streamlit, TensorFlow, Langchain, RAG
Databases: MongoDB, MySQL, Firebase(Real-time Database), Firestore, JSON, PostGresQL, Redis, ZODB
Tools: Material-UI, Bootstrap, Tailwind CSS, Figma, GitHub, Firebase, Vercel, Render, Netlify, Hugging face
Data Science & Machine Learning: Large Language Model (LLM), Numpy, Tensorflow, Pandas, Keras, Predictive Modeling, Statistical Analysis, Machine Learning Algorithms, NLP, NLG

WORK EXPERIENCE

Analyst Trainee ***— Django, React.js, LangChain, FAISS, CrewAI, OpenAI, WebSockets, ASGI, LLM Fine-tuning***
AltoMeta Consulting *Jan 2025 – Present*

- **Built** a **real-time chat API** with **Django EventStream** and WebSockets, reducing **LLM response time** by **500ms** and increasing throughput by **40%**. **Fine-tuned** an **LLM**, boosting **accuracy** by **30%**. Automated pipelines via **LangChain** & **FAISS**. Added **UUID tracking**, **response streaming**, and a **feedback loop** for AI optimization.

Project Intern ***— Python, Flask, ZODB, React.js, GenAI, LLM (Ollama - Llama 3), Anomaly Detection, SSE, ML***
Dell Technologies *August 2024 - April 2025*

- **Built** an **LLM-powered anomaly detection system** with **real-time ZODB logging**, **ensemble ML models**, and **Ollama (Llama 3)** for explainability. Tracked **20K+ anomalies/month**, optimizing detection **5x** via **Redis caching** and **React-based analytics**.

Product Developer Intern ***— React.js, Node.js, Express.js, MySQL, AWS, Cybersecurity***
Newton's Apple *April 2024 - July 2024*

- **Pioneered PhishInstinct**, an **AI-powered phishing simulation** reducing phishing susceptibility by **92%**.
- Implemented **automated attack campaigns**, **real-time threat analytics**, and **behavior tracking**, improving response time by **60%**. Created an **SMTP-integrated email system** with **Amazon SES, device fingerprinting**, and **phishing link tracking**, boosting detection accuracy by **85%**.

PROJECTS

- **DeepTraceAI – Compliance & Anomaly Detection** — *Redis, Docker, GCP, Bash, Flask, React.js, Ollama (Llama 3), ZODB, WebSockets, ML, Watchdog, Magic, DBSCAN*
  — **Automated CIS audits** by parsing **1200+ guidelines**, storing embeddings in **Redis**, and generating **Bash scripts** via **LLM**. Audited OS in **Docker** on **GCP**. Built a **real-time file logger** in **ZODB**, applied **ensemble anomaly detection**, and used **Ollama** for **explainability**. Integrated **dashboard analytics**. GitHub
- **DreamBridge - AI-Powered Career Guidance Platform** - *Python, Streamlit, NLP, pdf2image, PIL, Transformers*
  — Developed an AI-driven career roadmap generator with **85% accuracy** in **skill gap analysis** and **job-role matching**. Integrated **Google Generative AI** and **NLP** for **resume parsing** and **ATS optimization**. Utilized **pdf2image** and **PIL** for **resume processing** and **external APIs** for **market insights**. Enhanced user engagement via **scenario-based evaluations** and **real-time mentorship suggestions**. GitHub.
- **JusticeMet - AI-Driven Legal Chatbot** - *React Native, Flask, Python, LangChain, ChatGroq (Llama3-8b-8192), FAISS (Facebook AI Similarity Search), Streamlit, MongoDB, Pinecone Vector DB*
  — Designed a legal chatbot using **Gemini-1.5-Flash** and **RAG** for **case predictions**, integrating **Explainable AI**, **NLP**, encrypted data handling, and **Pinecone Vector DB** for precedent retrieval, ensuring secure and accurate results. GitHub

ACHIEVEMENTS AND EXTRACURRICULAR ACTIVITIES

- **Winner** - *INC Competition, PICT*: Secured 3rd place in the **Communication Networks & Security** domain.
- **Winner** - *Innovex Hackathon, AIT*: Secured 2nd prize in a national-level competition with a tech innovation.
- **Runner-Up – MMCOE Hackathon 2024** Built an AI-powered NLP and speech-to-text platform for document analysis and summarization.
- **Finalist – Amdocs Gen AI Hackathon 2025** Engineered a generative AI solution for automated insights, intelligent recommendations, and workflow optimization.
